

Eye, dental check-ups for kids

Around a hundred underprivileged students got their eye and dental check-ups done at an annual medical camp organised at La Martiniere for Girls on Saturday. The camp, which was

held after a gap of two years, was organised by La Martiniere Girls' Alumni Association. The check-ups were conducted by a team of doctors from Era's Lucknow Medical College and Hospital. Doctors told children on the correct techniques of washing hands and brushing teeth.
